You can select a LINE Official Account to be linked to the LINE MINI App. This feature is only available if you have another channel with the Messaging API feature under the same provider. If you configure the [Channel consent screen](#) to display the option of adding your LINE Official Account as a friend, see the [documentation](#).

In addition, official accounts created in LINE Official Account Manager can be linked with providers by enabling Messaging API. Please note that once a provider is linked by LINE Official Account Manager, it can't be changed or cancelled.

Localization (multi-language support)

Depending on the language set in the user's LINE app, your LINE MINI App's name and description can be displayed in various languages. To request a review, the channel name and description must be set in English under the Localization (multi-language support) setting.

In the Published LINE MINI App channel, the Channel name and Channel description registered under "Basic information" will be copied into the Channel name and Channel description fields in "Localization (multi-language support)" corresponding to the LINE MINI App's region.

開啟這個選項後可讓用戶透過外部瀏覽器開啟MINI App

If you enable this setting, non-LINE users will be redirected to a web browser when they access the LIFF URL, allowing them to use the service of the LINE MINI App without installing the LINE App. Before enabling this setting, check the following:

- This setting only works for non-LINE users outside of Japan, Thailand, and Taiwan. The county/region is determined by the web browser's language setting.
- Before enabling the setting, check that the service works correctly when a user accesses the endpoint URL in a web browser. For more information, see [What to check before enabling the setting](#).
- This setting is provided for use cases where the LINE MINI App and a web browser are used together for services such as mobile ordering at restaurants.

Basic information

LIFF URLs for the old domain name (`liff.line.me`) will still be available. For more information, see the [documentation](#).

You can set an original string for a LIFF URL of the published. For example, you can use a URL such as https://miniapp.line.me/cony_coffee as the LIFF URL. For more information on how to set this up, see [Configuring Custom Path](#).

Custom Path目前在內部測試，尚未開放申請使用

Review request

LINE MINI App verification status Your LINE MINI App is unverified.

If you want to publish your LINE MINI app as a verified MINI App, you need to request a verification review from LY Corporation.

Once the verification review is approved and the status changes to "Reflected", your LINE MINI App will be changed to a verified MINI App, and all settings will be reflected to the published channel.

If you update the settings in the channel after your LINE MINI App has been verified, some fields will need to be re-verified. For more information, see [here](#).

Note: If any fields that require a verification review by LY Corporation are modified, the modified fields will be reflected in the published channel when the status changes to "Reflected" after the verification review is approved.

Workflow in progress

The workflow below allows you to check the progress of a verification review or re-verification review.

創建MINI channel時預設為Unverified狀態(一般MINI App)，通過發佈審查後才會變更為Verified狀態(認證MINI App)。若在發佈(published)後要調整設定，大部分的狀況下是需要經過再次審查(re-verify)。請參考上述連結內的說明以確認哪些設定調整需經過再次審查

Workflow in progress

The workflow below allows you to check the progress of a verification review or re-verification review.

Input items required for a verification review

The following fields are reviewed by LY Corporation. All fields must be filled to request a verification review:

- ✗ Basic settings Channel icon, Privacy policy URL, Localization (multi-language support)(3)
- ✗ Web app settings Developing endpoint URL, Review endpoint URL, Published endpoint URL(
- ✗ Business information Customer support page URL, Customer support email address, LINE
- ✗ Contact information First Name, Last Name, Email address...(7)
- ✓ Service message template

開發完成且左邊所列所有欄位填寫完整後，按下“Request review”後即可送出審核申請。審核流程平均約需5~10個工作天。審核通過後，開發者可自行決定搜尋開啟(Enable Search)的時間

✓ Enter no more than 500 characters

In subsequent review requests after the first successful publication, the following fields will not be examined by LINE reviewers:

- Basic settings (Channel icon, channel description, channel email address, localization information)
- MINI App settings (Customer support information, customer support page URL, customer support email address, LINE Official Account URL)
- LIFF settings (Share Target Picker, bot link feature, header background color)

Note: In the case where modified information includes information that needs to be examined by LINE reviewers, the modified information will be reflected only after the examination is completed.

Request review

Before requesting a review, see [Submitting LINE MINI App](#) and confirm that you have completed all required tasks listed. If you pass the review, the ‘Enable search’ button will appear, which you need to press yourself. If left unattended, search will be automatically enabled after 30 days.

Review Request

See the [LINE Developers Console Guide for LINE MINI App](#) before applying for a pre-examination.

Enable search

Search will be enabled 30 days (including holidays and weekends) later, even if you don't click "Enable search". Once search is enabled, your App will automatically appear in the search results on the LINE Platform. For details, check the [documentation](#).

審核通過後會進入到Published狀態，按下“Enable search”後就會開啟LINE App搜尋即正式上架並向用戶公開
(搜尋功能一般在開啟後幾小時生效。一旦進入到Published狀態就無法再撤回申請；若要重新修改設定，需re-publish才能生效)

Review Request

If you update the fields in the channel after publishing the LINE MINI App, some items will need to be re-reviewed. For more information, see [Re-review after updating your LINE MINI App](#).

Note: In the case where modified information includes information that needs to be reviewed by LY Corporation reviewers, the modified information will be reflected only after the review is completed.

Publish changes

Your changes will be automatically published 30 days (including holidays and weekends) later, even if you don't click "Publish changes". For details, check the [documentation](#).
